L9P3: BDD AND USER INTERFACE DESIGN

Which statement is *false* about Lo-Fi UI and BDD?

- ☐ The purpose of the Lo-Fi UI approach is to debug the UI before you program it
- ☐ A BDD downside is requiring continuous contact with customers, which may not be possible
- ☐ A BDD downside is that it may lead to a poor software architecture, since focus is on behavior
- ☒ None are false; all three above are true
