L6P4: THE SESSION

Ben Bitdiddle claims:

You can put arbitrary objects (not just "simple" ones like ints and strings) into the `session[]`.

What do you think?

- ☐ True, knock yourself out!
- ☒ True, but a bad idea!
- ☐ False, because you can't put arbitrary objects into a hash.
- ☐ False, because `session[]` isn't really a hash, it just quacks like one.
