HOMEWORK 4

Here are the instructions for submitting HW4. Submission will be similar to HW3. You will submit a `.tar.gz` file with various directories of your app:

- `app/`
- `config/`
- `db/migrate`
- `features/`
- `spec/`
- `Gemfile`

If you modified any other files, please include them too. If you are using the Virtual Machine, navigate to the root directory for HW4 and run

```
tar czf hw4.tar.gz app/ config/ db/migrate features/ spec/ Gemfile
```

This will create the file `hw4.tar.gz`, which you will submit. Please note that the auto-grader may take longer than usual. If it takes more than several minutes, try refreshing the page.
