## HW 3 SUBMISSION

To submit your assignment, please submit a .tar.gz compressed archive file containing just your features directory. The command for doing this in a UNIX environment is:

```
tar czf features.tar.gz features/
```

Please make sure that the features directory is contained in the archive. For example, unarchiving your submission should create a directory named `features/` in the current working directory. It should not extract all your features directly into the current working directory.
