L6P2: MODEL OBJECTS

Assume table `fortune_cookies` has column `fortune_text`.

Which of these instance methods of `FortuneCookie < ActiveRecord::Base` will *not* return a silly fortune (if any)?

```
def silly_fortune_1
  @fortune_text + 'in bed'
end
```

```
def silly_fortune_2
  self.fortune_text + 'in bed'
end
```

```
def silly_fortune_3
  fortune_text + 'in bed'
end
```

They will all return a silly fortune.
