L8P3: CUCUMBER AND CAPYBARA

Which is *false* about Cucumber and Capybara?

- ☐ Cucumber and Capybara can perform acceptance and integration tests
- ☒ A Feature has ≥ 1 User Stories, which are composed typically of 3 to 8 Steps
- ☐ Steps use Given for current state, When for action, and Then for consequences of action
- ☐ Cucumber matches step definitions to scenario steps using regexes, and Capybara pretends to be user that interacts with SaaS app accordingly
