L5P3: MODEL-VIEW-CONTROLLER

Which statement is *not* true about the Model in Model-View-Controller?

- ☒ The CRUD actions only apply to models backed by a database that supports ActiveRecord.
- ☐ Part of the Model's job is to convert between in-memory and stored representations of objects.
- ☐ Although Model data is displayed by the View, a Model's direct interaction is with Controllers.
- ☐ Although DataMapper doesn't use relational databases, it's a valid way to implement a Model.
